

AN INVENTORY OF TL II PARTNERS

Since its launch in September 2007, TL II has been working very closely with its partners. To date, the partnership includes a large number of institutions and individuals across the nine target countries and beyond. We expect the partnership to expand as we forge linkages with more and more stakeholders. Here, we have tried to include as many partners as we have information for but we do not claim this to be an exhaustive list. As this our first attempt, we would welcome any additions so that we can incorporate them in our next update.

The listings here include TL II Advisory Board; Objective Coordinators; Principal Investigators; CG Centre Scientists; and Other Organizations and Projects. Then follow listings for the NARS. TL II-sponsored students are not included in these listings, as preparation of a separate directory for TL II students is currently under way.
